- **Sani-Bracket® Wall & Mobile Equipment Attachment System and Floor Stands**
 - Dispenses wipes from wall, mobile equipment mounting or floor stand

Sani-Hands® ALC
Antimicrobial Alcohol Gel Hand Wipes

The Newest Name In Infection Prevention

PDI is pleased to announce that new Sani-Hands® ALC Antimicrobial Alcohol Gel Hand Wipes will replace Sani-Dex® ALC Antimicrobial Alcohol Gel Hand Wipes. ***This is a name and reorder number change only – Sani-Hands® ALC will have the same enhanced formulation as Sani-Dex® ALC.*** Now part of the Sani-Hands® Family, the name modification allows customers to recognize and purchase the same product from Consumer retail store shelves. Make patient hand hygiene a part of your infection prevention and control initiative to reinforce your facility's commitment to patient safety.

Why Rub Them In, When You Can Wipe Them Out?

Rub-in alcohol-based handwashes (gels, foams and rinses) sanitize but leave debris and soil on hands. Sani-Hands® ALC Antimicrobial Alcohol Gel Hand Wipes help clean and sanitize hands with one product.

Evidence-Based Solutions for Hand Hygiene:

*Exceeded performance criteria defined in the 1994 FDA Tentative Final Monograph, requiring a hand wash product achieve >2.0 log₁₀ reduction in a marker organism after the first treatment. The performance of Sani-Hands® ALC is enhanced by the physical removal of soil and bacteria by the wipe, a function that rub-in alcohol-based handwashes alone can not accomplish.

YOUR PARTNER IN INFECTION PREVENTION, EDUCATION AND PATIENT CARE

*Independent Study.
